US AUDIOSHOW

Innuos to showcase full NAZARÉ stack at AXPONA 2026

Flagship system leads wider product presence across multiple rooms

Faro, Portugal
April 8, 2026

Innuos is proud to announce that the full NAZARÉ flagship stack - including the NazaréNET and NazaréFLOW - will be showcased this weekend at AXPONA 2026 in Chicago, in Quintessence Knowledge Room, located on the 1st Floor of the Renaissance Schaumburg Hotel & Convention Center. Nuno Vitorino, Innuos Co-Founder and R&D Director, will lead demonstrations on Saturday at 1 PM and Sunday at 2 PM (local time).

As the ultimate expression of Innuos' engineering and design philosophy, the complete NAZARÉ ecosystem combines state-of-the-art music streaming and server performance, advanced network optimization, and a high-end output stage to deliver exceptional digital audio reproduction.

The complete NAZARÉ ecosystem

NAZARÉ music streamer and server was unveiled in Faro at Innuos Headquarters just before the official launch at High End Munich, setting the stage for the brand's NAZARÉ World Tour - bringing the flagship experience to listeners, partners, and press across key markets like the USA, UK, Switzerland, China, Taiwan, Hong Kong, Thailand, South Korea, Singapore, Indonesia, Germany, and Japan.

Named after the Portuguese submarine canyon that creates some of the biggest waves in the world, NAZARÉ delivers unparalleled sonic realism and clarity. It brings powerful energy, immersive presence, and emotional depth of live music through exceptional sonic transparency. Faster yet smoother, NAZARÉ is a technological marvel engineered to deliver a

listening experience of remarkable scale and impact. It reveals subtle textures and dynamic range you may never have heard before. NAZARÉ will be enhanced even further with the addition of NazaréNET and NazaréFLOW, forming a three-piece solution for the ultimate audio experience.

The NazaréNET redefines network performance for high-end music streaming by regenerating the network signal - one of noisiest inputs into a digital source. The NazaréNET provides a much cleaner and well-timed signal into any high-end music streamer or server, infusing incredible musicality to the overall system. Taking the acclaimed PhoenixNET to a whole new level, it introduces a completely new internal circuit, advanced power supply architecture, and the robust, vibration-controlled chassis shared across the NAZARÉ platform. With one SFP fibre and four RJ45 ports, NazaréNET provides ground isolation from routers and advanced traffic management to reduce unwanted data flow and preserve signal purity. A must-have component for NAZARÉ owners and for all of those with high end digital front-end systems who want to experience immersive and organic audio.

The NazaréFLOW is a high-end digital audio reclocker designed to provide the cleanest and most well-timed signal to a DAC. The NazaréFLOW separates the DAC connection from the complex electronics of the streamer or server by regenerating the signal both from a timing and power perspective. This is done by the Master Reclocker Circuit with an ultra-high precision OCXO clock that acts as a single master clock for all digital data communication. The NazaréFLOW further improves performance by using custom Innuos-designed modular DAC outputs that leverage the internal protocols of dedicated DACs such as MSB and CH Precision (with more to come) to minimize processing on the DAC. The result is an increased sense of immersion and realism. Sound becomes palpable and alive. The NazaréFLOW is designed as the perfect companion for the Innuos NAZARÉ or any music server or streamer with USB audio output.

Visitors to AXPONA 2026 will have the opportunity to experience how the full NAZARÉ stack brings together precision engineering, refined craftsmanship, and software expertise in pursuit of truly reference-level sound.

Beyond the main NAZARÉ showcase, a wider selection of Innuos products will also be on demonstration across multiple rooms and systems throughout AXPONA 2026.

Innuos system and other partner rooms

Innuos will have its own dedicated rooms, 1408 and 1410, on the 14th floor of the Renaissance Schaumburg Hotel & Convention Center.

On demonstration, the brand will present a simple yet great-sounding system featuring the Innuos STREAM3 with PhoenixDAC and the Innuos STREAM3 with Performance DAC in A/B demos during the event, with both setups supported by the Innuos PhoenixNET network switch, while the rest of the system is composed of Wilson Audio Sabrina V speakers, a Dan D'Agostino Pendulum integrated amplifier, Transparent cables and power, CAD grounding, and a Quadraspire SVT rack. On display they will have STREAM1, LPS1, STREAM3, ZEN Next-Gen, ZENith Next Gen, PhoenixNET and PhoenixUSB.

In addition, Innuos products will be featured in the rest of the Quintessence rooms and areas (Connection, Perfection and Vestibule areas), as well as in a number of other partner systems throughout the show, including the MSB room (468), the ATC Loudspeakers room (1534), and the Songer Audio room (1645).

The Innuos team will be available throughout the event to meet and greet visitors, including Nuno Vitorino, Amelia Santos (Innuos Co-Founder and CEO), Stephen Healy (Product Specialist), and Thomas Graham (Americas Sales Manager). If you would like to schedule a meeting with Nuno or Amelia, in rooms 1408 and 1410, please book a slot via marketing@innuos.com

About Innuos

Founded in 2009, Innuos is a leading digital audio technology company dedicated to unleashing the magic in music. Engineered and handcrafted in state-of-the-art facilities in Faro, Portugal, acclaimed music streamers and servers are purpose-designed to elevate the digital listening experience for the most demanding audiophiles.

The nearly 50-member team, including a specialized R&D unit, ensures a holistic approach, pairing in-house developed software with meticulously selected, high-grade components and precision-engineered hardware. This dedication to sound quality, reliability, and ease-of-use is why Innuos products consistently redefine the potential of high-fidelity digital audio.

Innuos products have received over 100 press awards and highly praised reviews and are available in more than 50 countries through over 250 Hi-Fi partner stores worldwide. Innuos works with distributors in Thailand, China, Taiwan, Indonesia, Australia, South Korea, and Japan.

Innuos is a Hi-Fi brand committed to innovation, sustainability, and inclusion, and very proud of its social responsibility programs.
