

PRESS RELEASE

AUDIO SHOW

Innuos to Showcase the NAZARÉ Full Stack at Hong Kong Show 2026

A Partnership for a Reference Performance: NazaréFLOW Modular Reclocker & Converter will be fitted with the ProISL Module for MSB

Faro, Portugal
August 3, 2026

Every hi-fi system begins with a source. The quality of the source shapes how well the remaining Hi-Fi chain will perform. Innuos will present the NAZARÉ Full Stack at the Hong Kong High-End Audio & Visual Show, taking place from 7 to 9 August 2026 at the Hong Kong Convention and Exhibition Centre, to demonstrate how much a higher-end digital source can improve the overall sound quality of a Hi-Fi system at any level. Visitors to Hall 3 X08 will experience the complete NAZARÉ Series, engineered to deliver music with depth, realism, and emotion.

The NAZARÉ Full Stack

The presentation brings together three components from the NAZARÉ Series. The NAZARÉ Music Streamer and Server forms the foundation, built to deliver a powerful, immersive, and emotional musical experience. The NazaréNET Audiophile Network Switch refines the

digital signal path, and the NazaréFLOW Modular Reclocker & Converter completes the chain, restoring timing precision before the signal reaches the DAC.

A Platform Built for Partnership

A central feature of the NazaréFLOW is its collaborative design. The FLOW modules are built to implement the protocols of leading DAC manufacturers, including MSB, CH Precision, EMM Labs, and more. This approach allows Innuos to work directly with each manufacturer's technology and enhance performance at the point of conversion.

At the Hong Kong High-End Audio & Visual Show, the NazaréFLOW will be fitted with the ProISL Module for MSB, the result of the collaboration between Innuos and MSB teams, demonstrating this partnership in a live listening environment. The module implements MSB's native protocol directly within the NazaréFLOW, allowing the two systems to communicate with precision and bringing out the full potential of the MSB DAC.

Innuos reference system

The NAZARÉ Full Stack will anchor the reference system playing in the Innuos room, giving visitors the opportunity to hear the complete chain.

System in the room will feature:

NAZARÉ Music Streamer and Server
NazaréNET Audiophile Network Switch
NazaréFLOW Modular Reclocker & Converter with the ProISL Module for MSB
MSB Premier DAC
Audio Research REF 7 Pre-Amplifier
Audio Research REF 160M MkII Power Amplifier
Marten Parker Quintet Speakers
AudioQuest Power and Cables
Gizmod Rack
Artnovion Acoustic Panels

Innuos CEO and Co-Founder Amelia Santos, who will attend the show alongside APAC Sales Manager Yaohan Yang, commented: "Hong Kong is a market with a deep appreciation for music and overall system performance. Bringing the NAZARÉ Full Stack here, together with our MSB partnership, allows us to show what becomes possible when engineering and emotion work as one."

In terms of other partnerships, Innuos will be present in the Siltech room, with a STREAM3 with PhoenixDAC Music Streamer and Server.

About Innuos

Founded in 2009, Innuos is a leading digital audio technology company dedicated to unleashing the magic in music. Engineered and handcrafted in Faro, Portugal, its products are purpose-designed for the most demanding audiophiles with selected high-end components.

With over 100 press awards, availability in more than 50 countries, and a network of over 210 Hi-Fi partner stores worldwide, Innuos combines precision-engineered hardware with in-house developed software in pursuit of one goal: more music, more emotion, more magic.

Visit Innuos at the Hong Kong Show and unleash the magic in music.
