PRESS RELEASE

AUDIO VIDEO WARSAW 2026

Innuos debuts the new ZENith Next-Gen Full Stack in Warsaw

Next-Gen FLOW and Next-Gen NET are now available

Faro, Portugal
October 20, 2026

Innuos returns to **Audio Video Show Warsaw 2026**, taking place from **23–25 October**, with the new **ZENith Next-Gen Full Stack** taking centre stage in **SkyBox 229 at PGE Narodowy**.

The system combines the ZENith Next-Gen Music Streamer & Server, Next-Gen NET Audiophile Network Switch, and **Next-Gen FLOW Modular Reclocker & Converter** with the Next-Gen FLOW PhoenixDAC board. The three components are perfectly matched as a complete digital solution but can also be used independently to upgrade any Hi-Fi system.

Visitors will also have the opportunity to experience **Sense 26, just released**, introducing a new Classical Experience and AirPlay 2 integration.

The full stack will be demonstrated alongside **Avantgarde Duo GT** loudspeakers, **IsoAcoustics** isolation, **Siltech** cabling and power distribution, and **Artnovion** acoustic room treatment.

Complete digital source trickled down from the acclaimed NAZARÉ

Following their announcement at High End Vienna 2026, the Next-Gen NET and Next-Gen FLOW will make their first major public show appearance as part of the ZENith Next-Gen Full Stack.

At the heart of the stack, the award-winning ZENith Next-Gen, equipped with the PhoenixUSB board, handles streaming, local music playback and library management through the Innuos Sense platform.

The two supporting components incorporate technologies trickled down from Innuos' flagship NAZARÉ Series with carefully tailored implementations to maximise their potential:

- **Next-Gen NET:** Incorporates the top-end WaveNET platform and Next-Gen power architecture to maintain pristine data transmission and network isolation.

- **Next-Gen FLOW:** Adapts the ultra-low-noise power architecture and signal purification breakthroughs of the flagship NazaréFLOW, with both digital and analogue output modules to maximize output quality to almost any high-end system.

Both products are now shipping and can be experienced at dealers.

For the Warsaw demonstration, the Next-Gen FLOW will feature a prototype of the new PhoenixDAC board developed for the Next-Gen platform, offering visitors an exclusive opportunity to experience this upcoming addition to its modular architecture.

The Next-Gen FLOW also supports the same family of dedicated DAC connection modules as the NazaréFLOW, namely MSB ProISL, CH-Link, EMM Optilink and I2S (more to be added).

Powered by the new Sense 26

Released this week, Sense 26 introduces a new Classical Experience and AirPlay 2 integration, expanding the capabilities of Innuos' in-house developed software.

The new Classical Experience offers a dedicated approach to browsing and managing Classical Music.

With AirPlay 2 integration, listeners can conveniently stream audio from compatible Apple devices directly to their Innuos system.

These new features complement the existing Sense experience, which brings streaming services, locally stored music, internet radio and other music sources together within one intuitive interface.

Developed alongside Innuos hardware, Sense 26 reinforces the company's commitment to continuously enhancing the listening experience for Innuos owners.

The System in SkyBox 229

- **Innuos ZENith Next-Gen Music Streamer & Server with PhoenixUSB Board**
- **Innuos Next-Gen NET Audiophile Network Switch**
- **Innuos Next-Gen FLOW Modular Reclocker & Converter with the new Next-Gen FLOW PhoenixDAC board**
- **Avantgarde Duo GT loudspeakers**
- **Siltech Octopus G9 Power Distributor**
- **Siltech cables**
- **IsoAcoustics isolation**
- **Artnovion room treatment**

The Team in Warsaw

Innuos product experts will be on hand throughout the show for demonstrations, system discussions and advice on integrating Innuos products into existing digital audio systems:

- **Niall Hunt, Europe Sales Manager**
- **Stephen Healy, Innuos Product Specialist**

Innuos with a strong presence at the Tokyo Show

Alongside its participation in Warsaw, Innuos will have a strong presence at **Tokyo International Audio Show 2026**, also taking place this weekend, with its products showcased across multiple audio systems.

Innuos' Japanese distributor, **Timelord**, will showcase the **Next-Gen Full Stack**, while Innuos products will also feature in other demonstration rooms, including those of **Triode** and **TAD**, where visitors will have the opportunity to experience the reference **NAZARÉ Full Stack**.

Yaohan Yang, Innuos APAC Sales Manager, will be on site to represent the brand, meet partners and engage with visitors throughout the show.

The simultaneous presence in Warsaw and Tokyo reinforces Innuos' continued international expansion and commitment to bringing its latest digital audio technologies closer to music enthusiasts worldwide.

For media enquiries or to book a meeting, please contact the Innuos Marketing Team at **marketing@innuos.com**.

About Innuos

Founded in 2009, Innuos is a leading digital audio technology company dedicated to unleashing the magic in music. Engineered and handcrafted in state-of-the-art facilities in Faro, Portugal, its acclaimed products are purpose-designed to elevate the digital listening experience for the most demanding audiophiles.

The nearly 50-member team, including a specialized R&D unit, ensures a holistic approach, pairing in-house developed software with meticulously selected, high-grade components and precision-engineered hardware. This dedication to sound quality, reliability, and ease of use is why Innuos products consistently redefine the potential of high-fidelity digital audio.

Innuos products have received over 100 press awards and highly praised reviews and are available in more than 50 countries through over 210 Hi-Fi partner stores worldwide. Innuos operates through direct distribution while also working with local distribution partners in Thailand, China, Taiwan, Indonesia, Australia, South Korea, Japan, Vietnam, and the Gulf countries.

This is a brand committed to innovation, sustainability, inclusion and social responsibility.
